***Indoor Farming:  
A Revolution in Food Production Enabled By LEDs***

**The William Wright Lightmongers Lecture 2019**

**Thursday 27 June - 6pm to 8pm - UCL, London, WC1  
For Members and Guests**

Plant Factories (also known as indoor farms or vertical farms) are gaining widespread attention over the last few years. Pioneered in Japan, the last few years show an acceleration in the adoption of plant factories in other regions such as the USA, Canada, Europe and South-East Asia. This is possible through the use of LED light that gives new opportunities in the food production chain. Dr Celine Nicole will discuss how this innovative way of producing food can improve the taste and freshness we well as eliminate pesticides.

# The William Wright Lightmongers Lecture 2019

**University College London  
Auditorium - Christopher Ingold Building  
Department of Chemistry  
20 Gordon Street London WC1 0AJ**

Tea, coffee and biscuits on arrival
